AHMED MOHAMED MOSTAFA

Minya, Egypt | (+20) 01000092135 | engahmedmohamed320@gmail.com | www.linkedin.com/in/ahmed-mohamed-radwan

CAREER OBJECTIVE

Dedicated Computer Engineering Student specializing in Digital Logic Design, Embedded Systems, and Cybersecurity. Currently enrolled in the Digital Egypt Pioneers Initiative (DEPI) Penetration Testing track delivered by AMIT Learning. Proficient in VHDL, C++, Python, and Linux environments, with practical industrial training and expanding expertise in Network Fundamentals and Security Auditing. Seeking an entry-level engineering role or internship to apply technical hardware-software integration and security skills.

EDUCATION

Bachelor of Engineering – Computer and Systems Department **Expected Graduation: 2028**

Minia University, Faculty of Engineering, Minya, Egypt

- **Relevant Coursework:** Computer Architecture, Operating Systems (Linux), Data Structures, Digital Logic Design, TCP/IP Network Fundamentals, Network & Information Security.

TRAINING & PRACTICAL EXPERIENCE

Cybersecurity & Penetration Testing Scholar **2026 – Present**

Digital Egypt Pioneers Initiative (DEPI) – Partnered with AMIT Learning

- Participating in technical training covering network enumeration, system vulnerability assessment, and penetration testing methodologies.
- Hands-on experience with security utilities, packet capturing analysis (Wireshark), port scanning (Nmap), and Linux security administration.

Summer Engineering Intern **Aug 2026**

Misr Cement Group – P@TH Technical Academy, Minya, Egypt

- Completed an intensive technical summer internship focused on industrial automation, plant operations, and maintenance frameworks.
- Analyzed industrial infrastructure control loops and hardware-software architectures utilized in industrial manufacturing plants.

PROJECTS

Digital Logic & Hardware Implementation

- Designed and simulated digital systems using VHDL in Xilinx ISE and Proteus to verify circuit logic, timing, and implementation.
- Engineered core hardware building blocks, including Arithmetic Logic Units (ALUs), Shift Registers, and sequential multiplexing circuits.
- Built embedded system prototypes using Arduino and AVR microcontrollers, integrating sensor arrays and developing real-time control logic.

Software & Algorithmic Development

- Programmed algorithmic solutions and data structure implementations using C++ and Python.
- Integrated software control algorithms with physical hardware devices to solve practical engineering challenges in laboratory environments.

COURSES & CERTIFICATES

- **Digital Egypt Pioneers Initiative (DEPI):** Cybersecurity & Penetration Testing Track – AMIT Learning (2026)
- **Misr Cement Group (P@TH Technical Academy):** Summer Internship Certificate (August 2026)

TECHNICAL SKILLS

- **Cybersecurity & Networking:** Penetration Testing Fundamentals, Network Enumeration, Nmap, Wireshark, Linux Security Administration, TCP/IP
- **Hardware & Embedded:** VHDL, Digital Logic Design, Microcontrollers (Arduino, AVR), Circuit Simulation
- **Programming Languages:** C++, C, Python, Data Structures & Algorithms
- **Tools & Simulation:** Xilinx ISE, Proteus, Tinkercad, Microsoft Office Suite

LANGUAGES

- **Arabic:** Native
- **English:** Professional & Technical Proficiency
